

# Secretary to Secretary: The Path from Data to Decisions

From a keystroke at a school to a stakeholder's decision, a network of software applications supports data driven decision making (D3M). Linking software applications for data sharing is the role of technology standards such as SIF™ (Schools Interoperability Framework). System interoperability, as illustrated here, reduces the burden on school staff, strengthens data quality, and improves timeliness of data collection/reporting efforts.

★ Agent enables connectivity.
