Data Formats - SIF 2.2 Submission

This document describes the SIF objects and fields that an SIS must publish in order to participate in a state-wide SIF data collection in Wyoming. Pay special attention to the comments below each object. This same format is used to send vertical reports over SIF from SRM to the state.

SchoolInfo

Report one SchoolInfo per school in the district. SRM handles the case where multiple SchoolInfo records with the same StatePrId, but different RefIds are published. It also handles receiving the two SchoolInfo records from different zones with the same RefId.

SIF Field Used	Field #	Field Name	Valid Values / Format	Comments
@RefId				
StateProvinceId	10,	102 SchoolID	See Data Elements.	Displayed in the UI to the district user to help him identify the zone that he is syncing against when he runs a trial.
SchoolName				

StudentPersonal

Ideally, one StudentPersonal would be published for each student attending the district. However, SRM correctly handles the case where more than one StudentPersonal record is reported per student.

SIF Field Used	Field #	Field Name	Valid Values / Format	Comments
@RefId				
StateProvinceId	1	WISERID	See Data Elements.	
Name/LastName	2	StudentLastName	See Data Elements.
